

In the Specification:

Please replace the paragraph beginning on page 3, line ³20, with the following rewritten paragraph:

A1
Broadly stated, the present invention is directed to an improved system and method for customizing an interactive training sequence. The present invention allows users to customize their training sequence in order to avoid wasting time. In fact, the progress of the training sequence is saved and identified by a unique login identification, which allows users to return to where they left off in the last training sequence. In addition, the present invention provides a manual that is simple to use but nonetheless is comprised of a wealth of information. In addition, the different modules provide the user a variety of ways to understand the service and setup needs of the product. For example, the users can display documents, simulations and their custom training sequences. ~~Of these~~ Other features are provided in an extensive product service manual that is easy to use and entertaining.

Please replace the paragraph beginning on page 5, line ²⁴21, with the following rewritten paragraph:

A2
Similarly, when the guided tour module 24 is selected (block 20), a default guided tour page is returned and displayed to the user (block 44). The user selects a guided tour page (block 46), which is then displayed to the user (block 48). The preferred default guided tour page is shown in FIG. 5 as an example. The navigation buttons are located on the lower right hand corner of the page, which can be selected by clicking on them. For example, if a user clicks on the benefit button, the benefit page is displayed to the user (shown in FIG. 6). However, it

APD should be noted that there are no limitations in the design and appearance of any of the pages included in the manual as long as the function of the page is captured. It should be further noted that these other various implementations are contemplated and are within the scope of the present invention.
